### Seminar descriptions

#### Modernizing your electrical infrastructure

Your electrical infrastructure is the nervous system of our homes, campuses, and businesses. Learn methods of extending the life of your equipment and latest technology available to bring your infrastructure to its highest level of performance and intelligence.

#### Electrical safety trends

Safety is paramount when using or working around electrical equipment. Learn about the latest trends and solutions in hazard prevention, protection and awareness.

#### Managing your energy as an asset

Are you maximizing the potential of your energy consumption as a strategic asset? Learn how to view your energy bill as an opportunity to unlock capital and incentives that allow you to reinvest in modernizing your facility and increasing your energy savings.

#### Galvin Center of Electricity Innovation tour

Get a look at the future of Perfect Power with a tour of Illinois Institute of Technology Galvin Center of Electricity Innovation tour. See what is possible with Smart Buildings, Smart Energy, and a Smart Grid.

#### Eaton power experience trailer

Experience the demonstration of real power equipment and metering solutions in the Eaton power experience trailer.

#### Eaton solutions booths

See and experience solutions for your energy, infrastructure, and safety needs. Speak with trained professionals to learn what is possible to get you to the next level of performance with your electrical system.
